

How EFL looks from the Application side

Marcel Hollerbach

What apps do exist?

- ▶ Ephoto
- ▶ Terminology
- ▶ verne
- ▶ eNotes
- ▶ Edi
- ▶ Rage

Python apps!

- ▶ edone
- ▶ epymc
- ▶ egitu
- ▶ eluminance
- ▶ ede

UX problems with those apps

- ▶ Different ways for configs
- ▶ No way to share configs
 - ▶ Share favorite fs-locations between ephoto and verne
 - ▶ Share view preference like grid or list
- ▶ Different ways to present actions

Good things while using EFL

- ▶ The skeleton project lays the foundation for applications
- ▶ Fast application building
- ▶ Easy to abstract, by passing containers around

What things could be done better

- ▶ Config!

What things could be done better

- ▶ Config!
- ▶ Dialogs!

What things could be done better

- ▶ Config!
- ▶ Dialogs!
- ▶ Fileselector!

What things could be done better

- ▶ Config!
- ▶ Dialogs!
- ▶ Fileselector!
- ▶ Api Helpers!

What things could be done better

- ▶ Config!
- ▶ Dialogs!
- ▶ Fileselector!
- ▶ Api Helpers!

Api Helpers

- ▶ OAuth2
- ▶ Rest api
 - ▶ Webservice integration
 - ▶ Calender etc.
